- Permanently attached on/off handle- No wrench needed
- Pressure gauge in cylinder post valve- Shows oxygen level in cylinder
- Medium concentration mask and 7' kink proof hose-Sanitary single patient use
- Refillable lightweight aluminum cylinder- Maximum economy
- Highly visible instructions
- Complete system weighs only 11.5 pounds
- Meet FDA requirement - Use without a prescription

The immediate availability of oxygen in a respiratory crisis cannot be over-emphasized. In fact, speed in which oxygen is administered may significantly improve the victim's chance for survival.

*"Never, never, never withhold oxygen therapy from any patient in respiratory distress, even a patient with COPD. If the patient needs oxygen, provide it generously."*
